NARVI CONSORTIUM – SUCCESSFUL WORLDWIDE

The business model proposed by Narvi has proven itself. After only one year, it's more than \$ 30million in current bids and interest growing from week to week.

Narvi is a business model initiated by a Quebec company towards international success. The consortium was created in 2018 around a simple idea: to gather and offer all the expertise surrounding the industrialization of an integrated electronic system in order to offer our clients an electronic turnkey solution. Since then, the success and sustainability of this unique initiative in North America is undeniable.

Active in Quebec, United States and Europe, the consortium makes it possible to meet the requirements of support or local content, while grouping the complementary know-how of each partner.

“I’m excited about the overwhelmingly positive response we’ve received. I believe that the forthcoming years will have an even bigger impact on the industry as we meet needs for massive scalability. The success of the Consortium is that of the partner companies as a whole » Jean-Daniel Binant, VP Market Development - Electronics Assembly Solutions.

About Narvi, North America and Europe

Narvi is a marketing consortium composed of international partners in order to address emerging needs in North America as part of the Electric & Smart Transportation, Rail Transportation, Energy as well as the Smart City/HVAC and Medical.

Narvi is a world leader in the industrialization of integrated electronic and electromechanical systems for the industries previously named.

Our positioning in North America (Canada, United States) and Europe, will meet the requirements of support or local content, while bringing together the complementary know-how of each partner. This will also allow European customers to enter North America through local expertise.

About AIM Manufacturing, Rochester, New York, United States

AIM is a world-class manufacturer that specializes in the production of wire harness, ribbon cable, round cable, box build and electromechanical assemblies.

AIM supports many of the world's top OEMs by providing assembly, engineering, reverse engineering, kitting and prototyping of wire harnesses, custom cables and electromechanical assemblies.

AIM serves the commercial bus, truck, construction equipment, medical equipment, office equipment, automotive, industrial automation, and test equipment industries, and is recognized for outstanding service, value, quality and reliability of our products.

About Bartec-Vodec, Nottingham, United Kingdom, Part of the Bartec Group, Germany

Our company, based in Nottingham, United Kingdom, was founded in 2003 by a team of experienced communication engineers.
