## **NARVI EXHIBITED AT INNOTRANS – THE FUTURE OF MOBILITY**

AIM Mfg, Hypertronic Technologies and M2S Electronics, members of Narvi, exhibited at Innotrans expo in Berlin, an International Trade Fair for Transport Technology. Great discussions occurred on the industrialization of integrated electronic and electromechanical systems.

Our positioning in North America and Europe will meet the requirements of support or local content, while bringing together the complementary know-how of each partner.

### **Information**
